

Full Emoji List, v11.0

[Index & Help](#) | [Images & Rights](#) | [Spec](#) | [Proposing Additions](#)

This chart provides a list of the Unicode emoji characters and sequences, with images from different vendors, CLDR name, date, source, and keywords. The ordering of the emoji and the annotations are based on [Unicode CLDR data](#). Emoji sequences have more than one code point in the **Code** column. [Recently-added emoji](#) are marked by a \oplus in the name and outlined images; their images may show as a group with “...” before and after.

Emoji with skin-tones are not listed here: see [Full Skin Tone List](#).

For counts of emoji, see [Emoji Counts](#).

While these charts use a particular version of the [Unicode Emoji data files](#), the images and format may be updated at any time. For any production usage, consult those data files. For information about the contents of each column, such as the **CLDR Short Name**, click on the column header. For further information, see [Index & Help](#).
